Education

NMIMS MPSTME, Maharashtra

B.Tech in Computer Science | 2025 – 2029 | CGPA: 8/10

Experience

UAS NMIMS — Drone Team | Mechatronics and Researcher | Sep 2025 – Present

- Worked on autonomous drones.
- Worked with sensors and telemetry.
- Participated in drone competitions.
- Worked on drone control systems.

Freelance Technical Content Writer | Aug 2024 – Dec 2024

- Wrote technical scripts.
- Explained engineering topics to people.
- Created content about technical subjects.
- Some of the content received millions of views.

Skills

Python, C++, Java, JavaScript, TypeScript, SQL, Next.js, FastAPI, Streamlit, Docker, ROS 2, Supabase, Git, Linux, LLMs, Multi-Agent AI, LangChain, RAG, YOLOv8, OpenCV, MediaPipe, HuggingFace

Projects

Crewyard

- A platform for college developers.
- Built a website using Next.js.
- Connected students for projects and competitions.
- Added GitHub verification.
- Added search and authentication.
- Had more than 500 users.

Forge

- AI career platform.
- Built an AI system for resumes and interviews.
- Used multiple AI agents.
- Added resume scoring.
- Added mock interviews.
- Won a hackathon with the project.

ResQ Live Ops

- Built a system for drones used in disaster areas.
- Designed it to work without internet.
- Used YOLOv8 for detection.
- Worked on detecting people and hazards.

Drone Infrastructure Inspection

- Built a drone inspection system.
- Used ROS 2, Docker and YOLOv8.
- Added defect detection.
- Added location information.
- Built a dashboard using FastAPI and Next.js.
- Added telemetry, video and 3D mapping.

Achievements

- 1st place — Innovent 2026
- 1st place — Ideathon 2.0 2026
- 1st place — Google Developer Groups Hackathon 2026
- 3rd place — BGI Hackathon 2026

Interests

Artificial Intelligence, Software Development, Drones, Robotics, Computer Vision, Hackathons
